

NAVEEN SHARMA

Healthcare SaaS Implementation & Systems Configuration Specialist | Workflow Configuration | QA/UAT Validation

058-789-6289 | contact@naveensharma.net | naveensharma.net | linkedin.com/in/naveensharmatech | github.com/naveensharmatech | Be'er Sheva, Israel

PROFESSIONAL SUMMARY

Healthcare SaaS Implementation & Systems Configuration Specialist with 3+ years supporting healthcare SaaS platforms across intake, onboarding, compliance workflows, case management, QA/UAT validation, product support, and platform administration. Experienced configuring pre-service healthcare operations environments for home care, ABA, and developmental disability agencies. Strong background in workflow routing, data mapping, validation logic, user permissions, HHAeXchange-connected workflow support, production verification, and operational troubleshooting, supported by broader experience in quality control, business operations, and remote collaboration.

TECHNICAL SKILLS

Implementation & QA: Healthcare SaaS implementation · Workflow configuration · Systems configuration · QA/UAT testing · Production validation · Release readiness checks

Workflow & Data: Caregiver onboarding workflows · Patient/client intake workflows · Case management workflows · Compliance process setup · Data mapping · Field validation

API & Ecosystem: Postman API validation · HHAeXchange-connected workflow support · Integration process validation · Cross-system data checks · Root cause analysis

Tools & Platforms: Bolt Intake Platform · BoltDocs workflow system · Basecamp · Jira · Postman · GitHub · Cloudflare Pages · VS Code · Microsoft Office

AI & Productivity: Claude · ChatGPT · Gemini · Perplexity · Notion AI · Canva

Soft Skills: Self-starter · Async remote work · Cross-functional communication · Detail-oriented · Works under pressure

PROFESSIONAL EXPERIENCE

Healthcare SaaS Implementation & Systems Configuration Specialist

Aug 2022 - May 2026

Bolt Healthcare | Remote

- Configured and maintained healthcare SaaS workflows across intake, caregiver onboarding, case management, compliance tracking, agency onboarding, and pre-service operational processes.
- Administered platform settings with Super Admin access, including user permissions, role management, workflow routing, configuration settings, and operational controls.
- Built and maintained workflow rules, data mapping, validation logic, dropdown structures, e-signature steps, and document workflow automation as part of broader onboarding and compliance processes.
- Performed QA/UAT testing and production validation by verifying workflow logic, field behavior, data accuracy, output results, and go-live readiness before agency rollout.
- Supported HHAeXchange-connected workflow/API processes and validated operational handoffs across agency-specific healthcare environments.
- Provided product support and operational troubleshooting for healthcare agencies, investigating configuration issues, workflow failures, data validation concerns, and user access problems.
- Managed workflow and configuration requests through Basecamp-style task processes, coordinating updates from request review through testing, validation, and completion.

Technologies Used: Bolt Intake Platform, BoltDocs workflow system, HHAeXchange ecosystem, Basecamp, Postman, Jira, user/access management, QA/UAT testing, healthcare workflow administration

Quality Control & Validation Specialist

2021 - 2022

Vishay Intertechnology | Israel

- Performed quality control inspections and production validation across manufacturing operations, maintaining structured documentation and accuracy checks.
- Supported process compliance, operational quality improvement, and systematic validation practices in a regulated production environment.

Founder / Operations Lead

Aug 2012 - Sep 2015

Shivam Institute of Vocational Training (S.I.V.T) | India

- Founded and managed a vocational training institute, overseeing curriculum coordination, student administration, staff management, supplier coordination, and daily operations.
- Built operational experience in business management, client communication, scheduling, process organization, and team coordination.

PROJECTS & CASE STUDIES

Healthcare Workflow Configuration

2022 - 2026

Bolt Healthcare - Multi-Agency Workflow Operations

- Configured healthcare workflows covering caregiver onboarding, patient/client intake, case management, compliance tracking, data mapping, validation logic, and production readiness.
- Validated workflow behavior across agency-specific environments to confirm accurate routing, data capture, access permissions, operational usability, and go-live readiness.
- Supported agency-specific setup changes across home care, ABA, and developmental disability service environments while keeping workflows consistent and usable for operations teams.

Outcome: stronger onboarding readiness, cleaner workflow handoffs, and improved consistency across multi-agency operational processes.

Technologies: Bolt Intake Platform, BoltDocs workflow system, Basecamp, QA/UAT validation, healthcare workflow administration

HHaEXchange-Connected Workflow Support

2022 - 2026

[Bolt Healthcare - Integration Process Validation](#)

- Supported HHaEXchange-connected operational processes by checking workflow behavior, data/process handoffs, configuration accuracy, and issue reproduction.
- Used Postman and platform logs where applicable to validate request/response behavior, investigate data issues, and support cross-system troubleshooting.
- Confirmed operational workflow readiness before changes were released to agency users or escalated for engineering review.

Outcome: safer release validation and clearer troubleshooting evidence for HHaEXchange-connected processes.

Technologies: Postman, HHaEXchange ecosystem, workflow validation, data mapping, issue investigation

Support Insight & Defect Loop

2022 - 2026

[Bolt Healthcare - Product Support & Operational Troubleshooting](#)

- Reviewed recurring workflow, configuration, and data-related issues from operational requests, isolating root causes and documenting clear reproduction steps.
- Supported fixes through validation and follow-up checks, helping reduce repeated operational friction for agency users and internal teams.
- Translated operational problems into clear configuration notes, expected/actual results, and validation steps for internal stakeholders.

Outcome: faster issue clarification, better handoff to technical teams, and more structured operational support.

Technologies: Basecamp, Jira, workflow testing, root cause analysis, production validation

Professional Portfolio Website

2026

[naveensharma.net - Personal Brand & Technical Portfolio](#)

- Built and deployed a personal portfolio using React, Vite, Tailwind CSS, GitHub, and Cloudflare Pages, including modern professional positioning and AI-assisted development workflow.
- Configured domain deployment and professional contact presence for recruiter, hiring manager, and consulting visibility.

Technologies: React, Vite, Tailwind CSS, GitHub, Cloudflare Pages, VS Code

ADDITIONAL INFORMATION

Work Status: Registered Contractor in Israel - open to employment or contract roles · Availability: Immediate · Work Preference: Remote, hybrid, or on-site in Israel · Founder: Opility - opility.com

EDUCATION

BCA - Bachelor of Computer Applications

Jan 2022 - Feb 2026

[Amity University Online, Delhi](#) | *Cloud & Security*

QA Engineering Certification (Web & Mobile)

Sep 2021

[Smart College](#)

Additional Certifications: Software Testing · Automation Foundation
