Skills

SaaS Implementation & Workflow

- End-to-end SaaS onboarding & system implementation
- Workflow configuration & optimization
- Document lifecycle automation
- Intake pipeline setup & validation
- Business logic configuration in SaaS platforms

QA, API & System Testing

- API validation using Postman
- Functional, regression & UAT testing
- Test case design and execution
- Production release validation
- Bug tracking & lifecycle management (Jira / Basecamp)

Data & Systems Engineering

- Data mapping & validation in SaaS workflows
- System integration testing (API + SaaS)
- Root cause analysis of workflow/system failures
- CRM & intake system structuring

Profile

SaaS Implementation and Technical Solutions Specialist with 8+ years of total professional experience, including 4+ years specialising in healthcare SaaS onboarding, workflow automation, API validation, and QA/UAT engineering. Expert at translating complex business logic into structured system configurations to ensure data integrity, platform stability, and regulatory compliance. Available for B2B contracts — full-time or part-time, remote or on-site.

Employment

SaaS Implementation & Product Specialist (QA & Automation)

Aug 2023 – May 2026

Bolt Healthcare, Remote (USA)

- Led end-to-end API testing and validation using Postman to ensure secure, accurate integrations with HHAExchange and third-party SaaS platforms.
- Designed and executed functional, regression, and UAT test cases for the Healthtech Intake App, achieving 99.9% system uptime.
- Built PDF field mapping and validation logic to automate healthcare intake document workflows, increasing efficiency by 20%.
- Performed data validation and workflow audits to ensure accuracy, consistency, and regulatory compliance.
- Collaborated with engineering teams via Jira and Basecamp to triage defects, improve release quality, and support production deployments.
- Supported deployment validation and production release readiness across multiple SaaS rollouts.

Technical Support & Workflow Specialist (SaaS Operations)

Aug 2022 – Aug 2023

Bolt Healthcare, Remote (USA)

- SaaS Onboarding:** Configured system workflows and supported enterprise healthcare client technical onboarding.
- Data Validation:** Executed structured data mapping for dynamic PDF form processes, eliminating downstream submission errors and reducing intake errors by 15%.
- Tier 2/3 Support:** Resolved 50+ technical support tickets monthly via Jira/Basecamp, delivering root-cause analysis logs directly to engineering teams.

Technical Operator — Quality Control & Validation

2021 – 2022

Vishay Intertechnology, Inc.

- Performed precision QA testing and calibration of electronic components per strict regulatory standards, with full performance documentation and process-improvement analysis.

Founder / Operations Manager

Aug 2012 – Sep 2015

Shivam Institute (S.I.V.T), Dharamshala

- Managed the full operational lifecycle of a technical training centre — scheduling, supplier coordination, staff management, and IT infrastructure — growing enrolment by 25%.
- Oversaw training systems, operational workflows, and day-to-day technical operations.

Education & Certifications

BCA — Bachelor of Computer Applications

Jan 2022 – Feb 2026

Amity University Online, Delhi · Cloud & Security

QA Engineering Certification (Web & Mobile)

Sep 2021

Smart College

Additional Certifications: Software Testing · Automation Foundation
